Disclaimer: Analysis in this report is based on ECG alone and should be used as an adjunct to clinical history, symptoms, and results of other invasive and non-invasive tests and must be interpreted by a qualified physician. This report is generated by an AI algorithm rigorously validated over millions of ECGs. However, algorithm interpretations are intended to only aid clinical decision making, and should always be overread by qualified medical professionals and correlated clinically to arrive at a diagnosis. The measurements have been computed by an algorithm based on the ECG waveform.
